
EDUCATION

Comsats University

Bachelor's Degree in Computer Science

January 2019 - December 2023

SKILLS SUMMARY

- **Languages:** JavaScript, TypeScript, HTML/HTML5, CSS3 (SCSS)
 - **Frameworks:** ReactJs, Next.Js
 - **Libraries/Tools:** React-redux, Redux Toolkit, React Context, Material-UI, React-Bootstrap, Tailwind CSS, Shadcn.UI, Git, GitHub, Bitbucket, Jira, Clickup, Postman, Swagger.
 - **Soft Skills:** Strong problem-solving and debugging skills, Attention to detail in UI/UX design implementation, Collaboration and teamwork in cross-functional agile teams, Effective communication of technical concepts to non-technical stakeholders
-

WORK EXPERIENCE

React JS Internee – Rapidev Nstp

June 2022 - November 2022

- Developed scalable and responsive user interfaces for web applications using **React.js**, adhering to best practices for frontend architecture.
- Implemented **role-based access control** and **JWT token authentication** to secure user interactions.
- Collaborated with cross-functional teams to integrate APIs and ensure smooth backend/frontend interaction.
- Contributed to the development of an RTMS system and Owlsense project to help security or different organizations to track any person or information.

React JS Engineer - TrailFive Technologies Islamabad

March 2023 - Present

- Developing scalable web applications using **React.js** and **Next.js** with SSR and SSG for enhanced performance and SEO.
 - Integrated RESTful and GraphQL APIs for seamless frontend-backend communication.
 - Involved in state management using **Redux** and **Context API**, improving the app's maintainability and user experience.
 - Worked on improving application architecture and ensuring seamless UI/UX design with a responsive web applications.
 - Implementing best practices in web development, focusing on **React**, **Next.js**, and real-time communication with **socket.io**.
-

PROJECTS

Ringo

August 2023

- A platform to estimate the ballpark value of artists based on their profiles, market value, social media metrics (e.g., Instagram followers), and other relevant factors.
- Built an intuitive and responsive frontend for both admin and client portals using **React**, **Vite**, and **Tailwind CSS**.
- The client portal allows users to input dynamic parameters, while the admin portal provides oversight and control of the available options.

OR (Online Result)

March 2023

- Developed a recruitment platform using .NET.
- Contributed to the frontend development with React, Vite, and Tailwind CSS.
- Designed and implemented the interface for marketing job vacancies across multiple platforms.

Emailing Tool

October 2023

- Developed a cost-effective bulk email sending tool using Next.js, reducing costs compared to services like SendGrid.
- Integrated Unlayer for seamless email template creation within the application.
- Enabled users to send emails to selected recipients via CSV file uploads.
- Managed user authentication through cookies and middleware for enhanced security and performance.

Owlsense

June 2022

- A platform which helps security or different organizations to track any person or information.
- Enables monitoring and analysis of social media activities to detect potentially harmful or controversial campaigns.
- Developed an intelligence system using React.

RTMS

August 2022

- RTMS is a comprehensive system for tracking and managing various objects, including people, vehicles, logistics, and more.
- Integration of the Leaflet Mapping library to display markers and data on maps, allowing dynamic inputs and graphical representations of objects such as Calls, SMS, and Messages.
